
computer languages

CONTENTS OF VOLUME 15

Number 1

- I Softstrip® computer-readable data strip containing the table of contents of this issue of *Computer Languages*

Paul A. Bailes

- 1 The hierarchical development of a generic type mechanism for functional languages

J. R. Nawrocki and
C. H. A. Koster

- 27 On display optimization for Algol-like languages

Kelvin Nilsen

- 41 A stream data type that supports goal-directed pattern matching on unbounded sequences of values

John Franco and
Daniel P. Friedman

- 55 Towards a facility for lexically scoped, dynamic mutual recursion in Scheme

Number 2

- I Softstrip® computer-readable data strip containing the table of contents of this issue of *Computer Languages*

Joachim Biskup, Uwe Räsch
and Holger Stiefeling

- 65 An extension of SQL for querying graph relations

D. M. Dhamdhare

- 83 A usually linear algorithm for register assignment using edge placement of load and store instructions

Roger Hayes,
Norman C. Hutchinson and
Richard D. Schlichting

- 95 Integrating Emerald into a system for mixed-language programming

John Franco,
Daniel P. Friedman and
Steven D. Johnson

- 109 Multi-way streams in Scheme

Number 3

- I Softstrip® data strip containing the table of contents of this issue of *Computer Languages*

| | | |
|---|-----|--|
| A. Balachandran, D. M. Dhamdhere and S. Biswas | 127 | Efficient retargetable code generation using bottom-up tree pattern matching |
| Michele Di Santo, Libero Nigro and Wilma Russo | 141 | Programmer-defined control abstractions in Modula-2 |
| A. Burns and A. J. Wellings | 153 | The notion of priority in real-time programming languages |
| Daniel T. Huang and Ronald A. Olsson | 163 | An exception handling mechanism for SR |
| Leo Y. Liu and R. K. Shyamasundar | 177 | Exception handling in RT-CDL |

Number 4

| | | |
|---|-----|--|
| | I | Softstrip® data strip containing the table of contents of this issue of <i>Computer Languages</i> |
| Arvind M. Murching, Y. V. Prasad and Y. N. Srikant | 193 | Incremental recursive descent parsing |
| R. Nigel Horspool | 205 | Incremental generation of LR parsers |
| Wolfgang Kreutzer and Malcolm Stairmand | 225 | C-Flavours: A Scheme-based flavour system with coroutines and its application to the design of object-oriented simulation software |
| Jean-Chrysostome Bolot and Pankaj Jalote | 251 | Functional semantics of programs with exceptions |
